

## PRESS INFORMATION

### **Huf SixSense at International Car Rental Show in Las Vegas**

**Car rental 24 hours/7 days a week: The digital vehicle access system SixSense offers new opportunities for car rentals**

**Velbert, April 15th, 2018 Huf Group presents the digital access system SixSense at International Car Rental Show in Las Vegas. April 15<sup>th</sup> to 17<sup>th</sup> booth 432 at the Bally's Las Vegas.**

Making car rental more comfortable and easy, that is what the digital vehicle access system SixSense by Huf Group stands for. The combination of the individual branded and intuitive Mobile App to book, access and start the rental of vehicles, the easy installed Car Access Modul (CAM) and the customer centric service for car rentals form the core competence of SixSense.

Booking a vehicle via the App and receiving a digital key gives more flexibility and spontaneity to customers, without waiting in the queue at the desk. Due to comfortable user experience and intelligent processes it involves less red tape. The customer centric service, which includes connection to existing booking systems and fast security updates supports daily business. A secure back-end infrastructure that is always accessible, is guaranteed and supports smooth operations.

Moreover, the digital solution SixSense allows car rentals to reduce personnel expenses. By this, even small companies get the opportunity to expand their business: 24 hours, 7 days a week.

Huf Group

We develop and produce mechanical and electrical locking systems, tire pressure monitoring systems and telematic systems for the automotive industry worldwide.

Huf Secure Mobile is a young Business Unit of the Huf Group, which develops and markets digital access systems in combination with telematics and fleet management solutions under the SixSense Brand.
