

PRESSE INFORMATION

Smaller, lighter, smarter The new IntelliSens sensor generation

Frankfurt, September 2018 IntelliSens is the tire pressure monitoring system that goes ahead. Up-to-date is an important aspect for the best service. This is possible now with the update function of the latest sensor generation „Made by Huf“.

Huf will be exhibiting the company's new sensor generation at the Automechanika in Frankfurt, which was published at the international tire fair "The Tire Cologne" and is now conquering the market. The sensors are smaller, lighter, and smarter. Huf combines the advantages of two concepts with the new IntelliSens Huf universal sensors: the existing protocols on the sensor, which enable fast configuration, and the new update function, which enables the latest protocols to be transmitted to the sensor. The sensors receive via the TPMS tool an update of the protocols, which keep the sensors always up-to-date. Inventories of garages and waiting times for car drivers are further reduced by the new universal sensors. In addition, the compact design of the new sensor generation reduces the housing and thus significantly the weight of the sensor, which has a positive effect on the constitution of the sensor.

This is due to lower forces acting on the material while driving. IntelliSens has the largest tested vehicle coverage in the market, which is subject to current legislation.

Advantages of the new IntelliSens sensor generation

- Always up-to-date with the update function via TPMS tool
- Small, light and smart with the new design
- Highest market coverage
- Proved and established OE quality
- Made by Huf

Tire pressure monitoring systems from Huf – for automobile manufacturers all over the world

Huf develops and produces tire pressure monitoring systems (TPMS) for renowned automobile manufacturers all over the world: Audi, Aston Martin, BMW, Bentley, Bugatti, Ferrari, Lamborghini, Maserati, Mercedes Truck, Mini, Novabus, Porsche, Prevost, SsangYong, Volkswagen, and Volvo Truck, just to name a few.

In addition to offering original replacement sensors for the replacement parts market, Huf also offers the IntelliSens universal sensor, numerous valves, accessories, and tools

The Huf universal sensor IntelliSens has a new, compact design.
